ANALYTICS PROJECTS

Marketing Analytics: D2C ROAS Diagnosis | Practice case with sample data — 2026

- Broke a **32% ROAS drop** into a driver tree (CTR, conversion rate, order value, CPM) and ran **contribution analysis**; conversion explained 0.7 of the 1.2 point fall.
- Segmented by device to isolate a mobile conversion fall linked to landing page load time; proposed an **A/B test**, creative refresh and a KPI alert.

Fintech: UPI Payment Health Analysis | Paytm concept, simulated data — 2026

- Built an interactive dashboard of **success rate by hour, failure reasons and payment funnel** across merchant QR, P2P and bill pay; found that bank downtime and timeouts made up about **45% of failures**, all safely retryable.

Supply Chain: Delhivery RTO Shield | Self-initiated case, simulated data — 2026

- Analysed **return-to-origin (RTO)** by city tier and payment mode; tier 3 COD orders returned several times more often than prepaid metro orders, so I designed an **RTO risk score** with address checks and prepaid nudges.
