EXPERIENCE

Cloud Quality Analyst | KareXpert Technologies (Healthcare SaaS) — Feb 2025 – Aug 2025

- Executed **User Acceptance Testing (UAT)** against business requirements and acceptance criteria for a cloud-hosted healthcare SaaS platform on AWS, signing off releases with a **cross-functional team of 7**.
- Validated **CI/CD release pipelines** (Jenkins, Docker, Kubernetes) in an Agile/Scrum SDLC and tracked defects to closure with engineering and product teams.

Summer Intern, Customer Engagement & Conversion | Woxen Digital — 2026

- Designed a **28-question research survey**, wrote a **3C report** (Company, Customer, Competitor) and methodology dossier, and turned findings into weekly reports with recommendations.

Summer Intern, Business Process & AI Automation | Madrid Softwares, New Delhi — 2026 – Present

- Mapped **as-is operational workflows** and decision points for an Agentic Enterprise Operating System and wrote the business case, **approved by the faculty supervisor**.

ANALYTICS PROJECTS

Fintech: UPI Payment Health Analysis | Paytm concept, simulated data — 2026

- Built an interactive dashboard of **success rate by hour, failure reasons and payment funnel** across merchant QR, P2P and bill pay; found that bank downtime and timeouts made up about **45% of failures**, all safely retryable.

Marketing Analytics: D2C ROAS Diagnosis | Practice case with sample data — 2026

- Broke a **32% ROAS drop** into a driver tree (CTR, conversion rate, order value, CPM) and ran **contribution analysis**; conversion explained 0.7 of the 1.2 point fall.
- Segmented by device to isolate a mobile conversion fall linked to landing page load time; proposed an **A/B test**, creative refresh and a KPI alert.

Supply Chain: Delhivery RTO Shield | Self-initiated case, simulated data — 2026

- Analysed **return-to-origin (RTO)** by city tier and payment mode; tier 3 COD orders returned several times more often than prepaid metro orders, so I designed an **RTO risk score** with address checks and prepaid nudges.

Quick Commerce: Blinkit Stock Sense | Self-initiated case, simulated data — 2026

- Built **stockout risk heatmaps** by day and hour, **forecast vs actual demand (MAPE)** and fill rate views; proposed restock alerts two hours ahead of predicted stockouts.

Healthcare: Practo No-Show Shield | Self-initiated case, simulated data — 2026

- Analysed appointment **no-show rates by booking lead time and reason**; designed risk-based reminders, one-tap rescheduling and waitlist refills with a fairness check.
