PROJECTS

Marketing Analytics: D2C ROAS Diagnosis | Practice case with sample data — 2026

- Broke a **32% ROAS drop** into a driver tree (CTR, conversion rate, order value, CPM) and ran **contribution analysis**; conversion explained 0.7 of the 1.2 point fall.
- Segmented by device to isolate a mobile conversion fall linked to landing page load time; proposed an **A/B test**, creative refresh and a KPI alert.

Supply Chain: Delhivery RTO Shield | Self-initiated case, simulated data — 2026

- Analysed **return-to-origin (RTO)** by city tier and payment mode; tier 3 COD orders returned several times more often than prepaid metro orders, so I designed an **RTO risk score** with address checks and prepaid nudges.

Quick Commerce: Blinkit Stock Sense | Self-initiated case, simulated data — 2026

- Built **stockout risk heatmaps** by day and hour, **forecast vs actual demand (MAPE)** and fill rate views; proposed restock alerts two hours ahead of predicted stockouts.
